

DECEMBER 2024 QUARTERLY REPORT

The Board of Fin Resources Limited (ASX: FIN) (FIN or the Company) is pleased to provide its Quarterly Activities Report and Appendix 5B for the period ending 31 December 2024.

Cancet West Lithium Project

Desktop studies and regulatory reporting was carried out on the Cancet West Lithium Project during the December 2024 quarter.

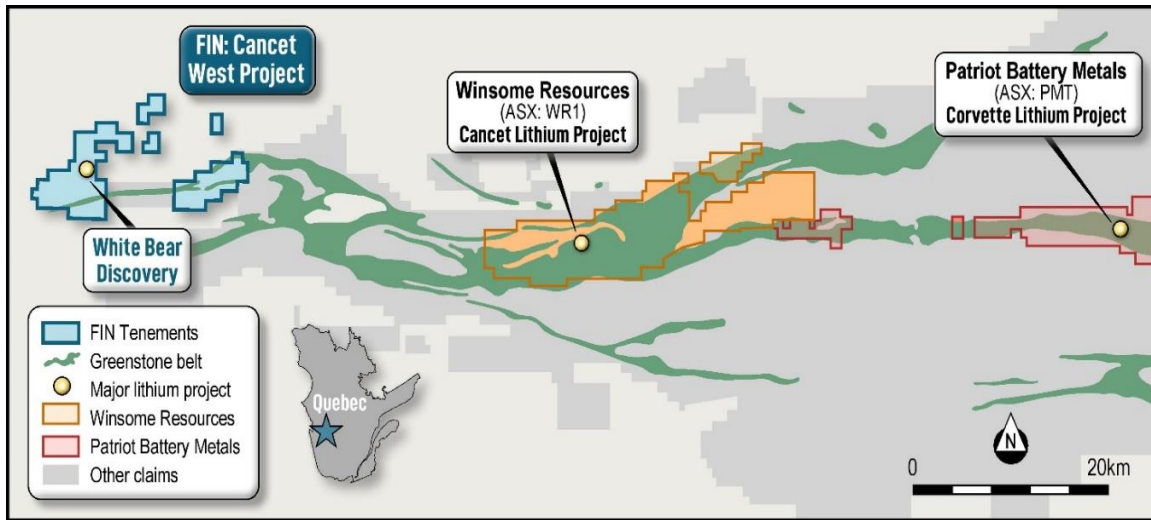

Figure 1 | *FIN's Cancet West Project Location*

Over 80% of the interpreted pegmatite trends are yet to be tested by FIN and the remaining 20% has only had minor rock chip sampling completed. Future exploration work is currently being reviewed.

Ross Lithium and Uranium Project

Desktop studies and regulatory reporting were carried out on the Ross Lithium and Uranium Project during the December 2024 quarter.

Historical sampling completed in 2007 by Landmark Minerals Inc. across their Rupert River Uranium Project (the western portion of which covers FIN’s Ross Project) reported a soil sample of up to 1,260 ppm U (1,486 ppm U₃₀₈). This historical data combined with anomalous pathfinder elements including Total Rare Earth Oxides (TREO) and Th levels in pegmatite samples 138203, 138204 and 138227 previously reported by FIN, is potentially indicative of U-Th-REE bearing pegmatites that can show geochemical overlap with LCT (Lithium- Caesium-Tantalum) pegmatites. The TREO and Th results, and historical Uranium results are shown in Figure 4.

Analysis previously completed by Dr Neil Pendock identified a significant number of potential Uranium occurrences across the Ross Project. Gas estimated from Sentinel-2 VNIR showed anomalous helium which may originate from radioactive decay of Uranium.

FIN is considering a high resolution airborne magnetic and radiometric surveys across the Ross and Cancet West Projects, the timing of which is yet to be determined.

McKenzie Springs Project

During the quarter, the Company commenced planning for on ground exploration at the McKenzie Springs Project. FIN is aiming to complete these exploration activities during the first half of 2025.

A data review carried out earlier in the year, incorporating the most recently acquired data, highlighted the limited amount of previous exploration to test airborne and ground EM conductors within the McKenzie Springs Project area. The majority of the VTEM conductors within the lease lack adequate geological reconnaissance and surface geochemical sampling and are therefore largely untested by drilling.

A ground FLTEM survey has been designed to test the interpreted gossan visited during the November 2023 field work program. The survey design has three 300m x 400m FLTEM loops, 100m spaced lines, 50m station spacing with ~170 stations in total. This survey has been designed by Mat Cooper from Core Geophysics after assessment of the available VTEM data.

In addition to the ground FLTEM survey, the postponed program of stream sediment sampling is now anticipated to be carried out, during the first half of 2025, along drainage channels that exist across the Spring Creek Intrusion along with outcrop mapping and rock chip sampling by a field geologist.

The aim of the 2025 field work program is to improve on the current surface geochemistry and geophysical coverage across the Spring Creek and McKenzie Springs Intrusions and delineate drill ready targets within 12kms of a critical metals mine and processing facility. Additionally, this program of work will help FIN to define the most appropriate methods for Ni-Cu sulphide exploration within the McKenzie Springs Project area and refine the methods to be used in the future for exploration success.

Corporate

Financial Commentary

The Quarterly Cashflow Report (Appendix 5B) for the period ending 31 December 2024 provides an overview of the Company's financial activities. The Company had \$251k in cash at the end of the quarter. Expenditure on exploration during the reporting period amounted to A\$271k which related to costs associated with the maiden diamond drill program at the White Bear Lithium Discovery. Payments for administration and corporate costs amounted to \$25K. Nil payments were made to related parties and their associates during the current quarter.
